

MAUS KPIDashboard

Transform your data into powerful management dashboards

KPI Dashboard from MAUS business systems provides you with a powerful but simple platform to display and understand every aspect of your business.

KPI dashboard takes all your financials, strategies, obstacles and action plans, and combines them into a one page dashboard. ... Perfect as a monthly reporting tool.

If you have key employees this system makes them accountable and helps them drive toward a common set of goals.

KPI Dashboard goes beyond the numbers, because every business is collaborative. If you and your employees are not on the same page it is nearly impossible to move towards the same goal effectively.

"(MAUS) KPI Scorecard allows us to carry out detailed and relevant analysis of our business performance in minutes"

Bob Coulthurst

- **Web-Based**
- **Easy to use**
- **Affordable**
- **Visual dashboards**

BALANCED SCORECARD THEORY

Based on a simplified balanced scorecard methodology

We have produced a web based application that will...

- 1. Produce powerful 'one page' visual dashboards complete with strategies:**
At a glance the application will allow you to easily determine the performance of any scorecard.
- 2. Save you hours of time by easily producing reports at any organisational level:**
KPI Dashboard automatically lets you analyse any KPI over any time frame by any comparative scale (budget, last year, last period, group performance, level performance), complete with graphs
- 3. Allow you to benchmark**
At the click of a button, you can compare any given KPI against the field giving you a report with averages, rankings and customised benchmarking.
- 4. Allow you to extend your reporting to non financial KPI's:**
This product is completely customizable and allows you to enter any non financial KPI's relating to such things as customer service or employee satisfaction.
- 5. Allow you to enter data & produce reports from anywhere in minutes:**
KPI will allow you to set up a consistent reporting system which allows you or your colleagues to enter and review data with ease from anywhere using anything that can connect to the internet.
- 6. Allows multi level permissions**
KPI Dashboard will give you the piece of mind with the multi-level security function. This will allow you to have peace of mind knowing all your data is.

Key Benefits / Features

- Easy to use
- Instant report generation
- Multi level permissions/security
- Access from any device with internet
- Low cost
- Easy to set-up
- Weekly / monthly reports
- Traffic light warnings
- Includes strategies

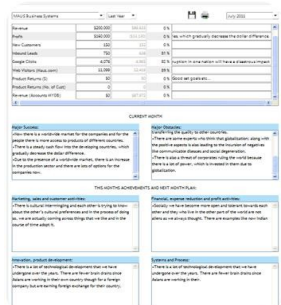

Available in :

- Consultants Version
- Professional Version
- Enterprise Version

Powerful Reports at the Click of a Button

KPI & Group Set Up
Quickly and easily enter all the KPI's and Groups you wish to monitor.

KPI Data Entry
Enter in your weekly or monthly KPI data and watch as your KPI report is automatically generated complete with comments on relative performance.

Graph Generation
At the click of a button the software can generate a graph analysing any KPI or any group over any time period.

The Scorecards
Based on Balanced Scorecard theory, the reports generated are useful and easily interpreted.

Who would benefit from using KPI

Business Owners & Managers

Small to medium sized businesses

KPI Dashboard is an easy way to increase profit. It's impact across the business is almost instantaneous.

High Growth Companies

Maintaining control whilst growing is critical. KPI Dashboard provides the accountability system that keeps the organisation on the one page.

Sales orientated organisations

The best way to motivate a sales team is to benchmark performance. All sales reps can be setup to compete against each other.

Franchisors & Multi Location Businesses

Common reporting across the group is essential. KPI Dashboard provides comparison reports across divisions or franchisees as well as a board room style monthly report.

Specialist Divisional managers of larger companies

In larger organisations Divisional managers may be responsible for areas such as OHS, HR and Production. KPI Dashboard allows reporting for any area.

As well as Consultants & Investors

Accountants & Specialist Advisors

KPI Dashboard will be the catalyst to implement a highly profitable business advisory arm. KPI Dashboard provides a systematic methodology that can help establish strong recurring revenue platform.

Business Advisory & Coaching firms

KPI Dashboard offers a systemised business coaching platform. It turns an informal meeting into a methodical process that has clear outcomes, responsibilities and reporting at its conclusion.

Investors & Venture Capitalists

KPI Dashboard helps you to protect your investment. Monthly reporting and an accountability process is the key to a good long term partnership.
