

# MAUS

## HSEQ Management System

All of your compliance-based needs integrated in one easy to use dashboard

*"As a small to medium sized business, we were constantly at odds with keepng up to date with every changing regulation and managing our policies and procedures. MAUS has been a revelation for our business, providing our HSEQ solutions while addressing performance and accountability in our business*

**Clair Neale - Hydroflo Solutions**

Imagine having all of your HSEQ reporting and record keeping in one cloud-based platform. Many organisations recognise the need to run Health & Safety, Quality Assurance and Environmental systems, however these are all run as separate systems.

That's why we have developed an integrated HSEQ Management System for SMEs to manage their Compliance systems and processes.

Easily navigate through the simple workflow to set up your employees and sites relevant to your business, from here you can assign tasks and responsibilities for users to follow up and make sure all areas are covered - all within one platform to ensure everyone is on the same page, no matter if they are on site or in office!

Incident management has never been easier with the MAUS platform, simply fill out the customisable form to pinpoint the areas of interest and compile the report into a professionally formatted pdf - you can also send off an automatic notification to any supervisors or managers

Using the in-built company logs register, you will easily be able to follow up any HSEQ non-conformances that may occur - from here, you can set up corrective actions that must be completed by an accountable user who will receive automated email notification until the task is completed.

All HSEQ-based KPI's can be consolidated into a one page snapshot to give you a monthly update for the progress of your businesses HSEQ processes and identify any areas that need additional attention.

The in-built Activity Register & Risk Register will automatically populate your Safe Work Method Statements (SWMS) for all employees to evaluate and export to Word or PDF - you can even email from the system!

Backed by industry professtional, consultants and auditors, MAUS HSEQ Management Systems offers leading cloud-based management solutions for SMEs to systemise and scale their compliance processes

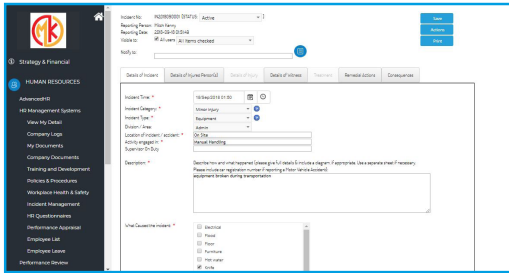

---

At the click of a button, MAUS HSEQ Management Software provides you with:

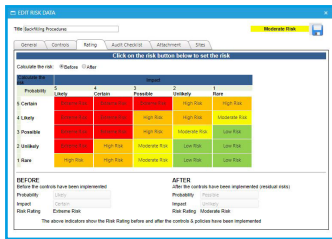

- A complete toolbox of HSEQ modules to help streamline and automate your compliance processes
