## Health & Safety Planner

The easiest and most effective way to improve your  
Health & Safety System -  
Perfect for ISO 45001 Certification!

*"I am writing to express our sincere delight with the Health & Safety Planner I recently purchased [it is] extremely easy to operate and is very user friendly."*

**Heather Garland**  
CFO, Amber Technologies

Finally, an affordable tool that ensures your business is protected from the loss of time and money associated with injuries and accidents in the workplace. MAUS Health & Safety Planner helps you develop your safety policies and procedures through a simple question and answer format.

Comprehensive and easy to understand, MAUS Health & Safety Planner guides you step by step as you develop WHS documentation for your business quickly, easily, affordably and with credibility.

Health & Safety Planner includes sections on management of risk in the workplace, accident and incident reporting, emergency procedures, the WHS consultative process, general safety policies, safety performance monitoring, safety inspections, safety in the office and a comprehensive selection of Health and Safety templates and forms.

Enforce your H&S documentation with our handy tools for complying in your business such as document control, automated employee acknowledgement systems and history audit trail.

Updated for ISO legislation, Health & Safety Planner also has inclusions for WHS. It contains hundreds of pages of WHS content.

With such an impressive collection of features, MAUS Health & Safety Planner saves you time, money and provides a comprehensive foundation for complying with legal obligations. Enjoy a clear path through the process of putting Health & Safety documentation into your business.

You will be simply astounded and left asking yourself why you had not invested in MAUS Health & Safety Planner earlier!

---

## Automated Employee Compliance

Ensure all employees and contractors comply with your latest documentation

## Who Should Use MAUS WHS Planner?

Any business that employees people should consider investing in a program that could save them thousands of dollars in litigation for breaches of safety regulations. The smaller the business, the bigger the impact a legal action will have against the survival rate of the business.

Health & Safety Planner has been designed in an easy to navigate and read style, no complicated legal terms and no required prior knowledge of WHS Legislation. Anybody is now able to safeguard their business and working environments - simply by clicking their mouse!

## Key Benefits

A safety program is probably the single most important component to controlling compensation costs, time lost due to accidents, and even workplace morale. Writing and communicating are the key steps to ensuring the success of a safety program in your business. Improve safety and productivity and protect yourself from litigation. With the hard work of writing the plan being eliminated you can concentrate on implementing and communicating guidelines.

Add to the value of your business with comprehensive systems documents for Health and Safety.
